Subject: Thanks

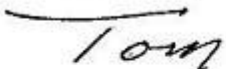

Teddy,

I just want to tell you that the Schertz Caterpillar Machining Facility was one of the smoothest most efficient and enjoyable construction projects I have ever been involved with. I think it was in large part due to your leadership and coordination from the very beginning. You saved us from some pit falls and helped us to reduce the overall cost of the building significantly and still get a quality product in the end. Your customer focus is exceptional and everyone working for you understands and reflects your belief that pleasing the customer comes first.

Curtis Crider was also a key factor in the success of this project. He generated momentum and expectations of the subs that pushed the project along at a rapid pace bringing the building in over a month ahead of schedule saving all of us a lot of money. I have never seen subs work together in harmony with out finger pointing and arguing. They loaned each other tools, equipment and manpower anything to keep the job moving ahead when that is not the norm in the industry.

Kudos to you and your staff for a job well done. I hope we get a chance to work together again.

Thanks,

Tom Rinehart
