To Whom It May Concern:

KDC has been utilizing FA Peinado for site and shell building construction services on our data center projects in Richardson, TX and Houston, TX. Having completed the fourth of these and just recently starting the fifth, the compressed schedule requirements demanded an expert builder to assure that all schedule, budget, safety and quality goals were met simultaneously. KDC could not be more pleased with the outcome on each and every one of these projects.

Throughout the bidding, construction, and the closeout phases FA Peinado has worked as a true cooperative team player making the experience both highly successful and enjoyable. Their staff, both onsite and off, were proactive at all times in their efforts to avoid issues and keep the project as streamlined and seamless as possible. They coordinated the site and shell building scopes with the interiors contractor, including heavy MEP requirements, at a high level to ensure adherence to very tight timelines.

The efforts by the FA Peinado team are greatly appreciated and we look forward to working with them again. Their quality, speed, and professionalism are second to none and we would recommend them to anyone in need of a high quality commercial General Contractor.

Sincerely,
